Subject: Re: Aldicarb - new use PCA/PCT work

I'm like 80% sure they just the extended SUUM report, but I will contact Jen and Sumathy and they should be able to tell me exactly what is necessary. I will CC the team on this.

Hi,

Steve – I didn't see a link in the email you sent.

I've preliminary reached out to BEAD (Mark Suarez) to let them know that we have been asked to perform this work. His preliminary indication was that additional information will need to be generated by BEAD, but I really wanted to get a sense of what that is before we actively go down that road.

Josh – if you know what is needed that is great. If not, do you know who to reach out to on the EFED PCA/PCT team?

Thanks,
Amy

Josh:

Here is a link to the BEAD data from 2010, but it is in a very unusual format. I'm not sure that it is helpful.

Steve

Thanks much, Josh, for your help.

This PRIA action is for new use on citrus.

Attached is the original DWA, updated EDWCs, and two PWC files for surface water.

Also some label informations are attached.

Advise if you need any additional info.

Jim

Hi All,

Do you have a folder with the current set of aldicarb information (previous assessments, PLUS reports, detailed use summary tables, ect.) that you can share with me so I can start getting up to speed on the topic? Thanks!

Josh

Subject: Aldicarb - new use PCA/PCT work

When: Tuesday, September 15, 2020 11:30 AM-12:00 PM.

Where: Microsoft Teams Meeting

Hi,

This meeting is to help scope out what is needed to perform a PCA/PCT analysis for the citrus new use for aldicarb. I'm particularly interested in what information will be needed from BEAD to perform this work, if possible.

Thanks,

Amy
